

Welcome!

We are truly thankful that you have chosen to work with **IntelligeneCG**SM!

We are very happy to inform you that **IntelligeneCG**SM now partnering with Color Genomics extend its hereditary cancer genetic testing to the following states: California, Florida, Maryland, New York, Pennsylvania and Rhode Island.

IntelligeneCGSM portfolio includes a comprehensive analysis of **30 genes**, associated with the most common hereditary cancers: breast, colorectal, melanoma, pancreatic, prostate, ovarian, stomach, and uterine.

The combined teams of highly qualified professionals, with specialized experience in genomics, from **IntelligeneCG**SM, allows us to confidently offer our clients comprehensive and detailed reports for all of our tests. Reports are available to providers quickly via the **IntelligeneCG**SM HIPAA compliant portal and to patients 20 days after they are available to providers, in the Color patient portal.

IntelligeneCGSM and Color Genomics have a strong commitment to ensuring providers and patients understand their test results by providing support and assistance in the interpretation of reports. For patients being tested for hereditary cancer syndromes, **IntelligeneCG**SM offers you and your health-care provider access to a team of board-certified genetic counselors to answer any questions you may have about your results.

If you have any questions please feel free to contact us at 913.258.2300, Monday through Friday, 9:00am-5:00pm CST.

We are glad to have you on board and look forward to helping you with all your cancer genomics needs!

IntelligeneCGSM Team
